(949) - 813 - 3480

Foothill Ranch, CA

EDUCATION

California State University Fullerton - B.S., Computer Science

2019 - current, GPA: 3.64

Fullerton, CA

Awards

- Dean's List

Relevant courses

- Object Oriented Programming, Data Structures, Computer Security, File Structure & Database, Assembly Language, C Programming, Web Front-End Engineering, Compilers and Languages

PROJECTS

Predictive Parsing Compiler - Creator

- Designed and implemented a predictive parsing compiler for a programming language, including defining the grammar for the language and implementing a predictive parser that could take in a string and verify it passes the grammar.
- Utilized data structures such as stacks to facilitate the parsing process
- Developed test cases and performed debugging to ensure the correctness and reliability of the compiler

Game website - Group Project

April 2020

- Collaborated and led a group to create a simple rock paper scissors application using Node.js, tailwind CSS, and html.
- Worked with the team to create a visually appealing interface using the tailwind framework
- Added additional features, such as a scoreboard and CPU to play against , to enhance user experience and helped publish site on GitHub Page

SKILLS

- C++
- HTML/ CSS
- C
- SQL
- JavaScript
