EDUCATION

California State University Fullerton - B.S., Computer Science

2019 - current, GPA: 3.64

Fullerton, CA

Awards

- Dean's List

Relevant courses

- Object Oriented Programming, Data Structures, Computer Security, File Structure & Database, Assembly Language, C Programming, Web Front-End Engineering, Compilers and Languages

PROJECTS

Predictive Parsing Compiler - Creator

- Designed and implemented a predictive parsing compiler for a programming language, including defining the grammar for the language and implementing a predictive parser that could take in a string and verify it passes the grammar.
- Utilized data structures such as stacks to facilitate the parsing process.
- Developed test cases and performed debugging to ensure the correctness and reliability of the compiler.

Game website - Group Project

- Collaborated and led a group to create a simple rock paper scissors application using Node.js, tailwind CSS, and html.
- Added additional features, such as a scoreboard and CPU to play against to enhance user experience and utilized tailwind for design.

SKILLS

Languages

C++; HTML/ CSS; C; JavaScript; SQL.

Technologies

Git ; MariaDB; Node.js

WORK EXPERIENCE

Pizza Hut - - Driver / Customer Service Representative

June 2020 - September 2020

- Opened and maintained store in clean, neat matter.
